

Uniden UV350 FirstNet Ready In-Vehicle Communicator

FNSPEED Promo: \$300 Off + FirstNet \$300 Service Credit Promo

The Uniden UV350 is the first LTE all-in-one in vehicle fleet communication device that delivers crystal clear cellular voice calls, Push-to-Talk Over Cellular, data applications, FirstNet Ready capabilities, and more. This device was designed specifically for commercial vehicles ensuring safer communication for professional drivers.

While schools are closed, it's a great time to schedule installation.

Have your fleet of busses ready with a new communication system by the time school is back in session.

Historically, two-way radios in busses have a number of issues such as slow communication, a high amount of static and other factors that make it difficult to receive the message. Upgrade the two-way radio system you currently have in your school bus fleet to the Uniden UV350 In-Vehicle Communicator for fast, crystal clear communication.

MSRP: \$960
